

Welcome to  
Better Meetings.

Welcome to

The Quicklaunch™ application is a simple and secure meeting room interface that provides multi-platform integration to transform any PC into a one click meeting space.

Quicklaunch™ SE provides a consistent and secure interface for your huddles spaces and meeting rooms that is incredibly easy to use, saving you time and increasing your productivity. Easily switch between the persistent toolbar and desktop view with customized and tiered buttons.

Quicklaunch™ is built with security in mind. Unlike other meeting room applications that can unknowingly leave behind temporary files containing sensitive data. Quicklaunch™ keeps your confidential data secure with the 'Room Reset' feature which clears temporary, files, cache and more to delete the data before the next group meets. Quicklaunch™ also has an optional 'lock-down' mode to further restrict the usage of the PC in the meeting room.

With Quicklaunch™, your meeting space is always ready to join or create new meetings with a simple touch. Quicklaunch™ is more than just a system to join meetings with one-touch. It seamlessly brings multiple technologies together into a single application, enabling collaboration rather than complicating it.

Endless Possibilities

## Extended Enterprise One-Touch Experience

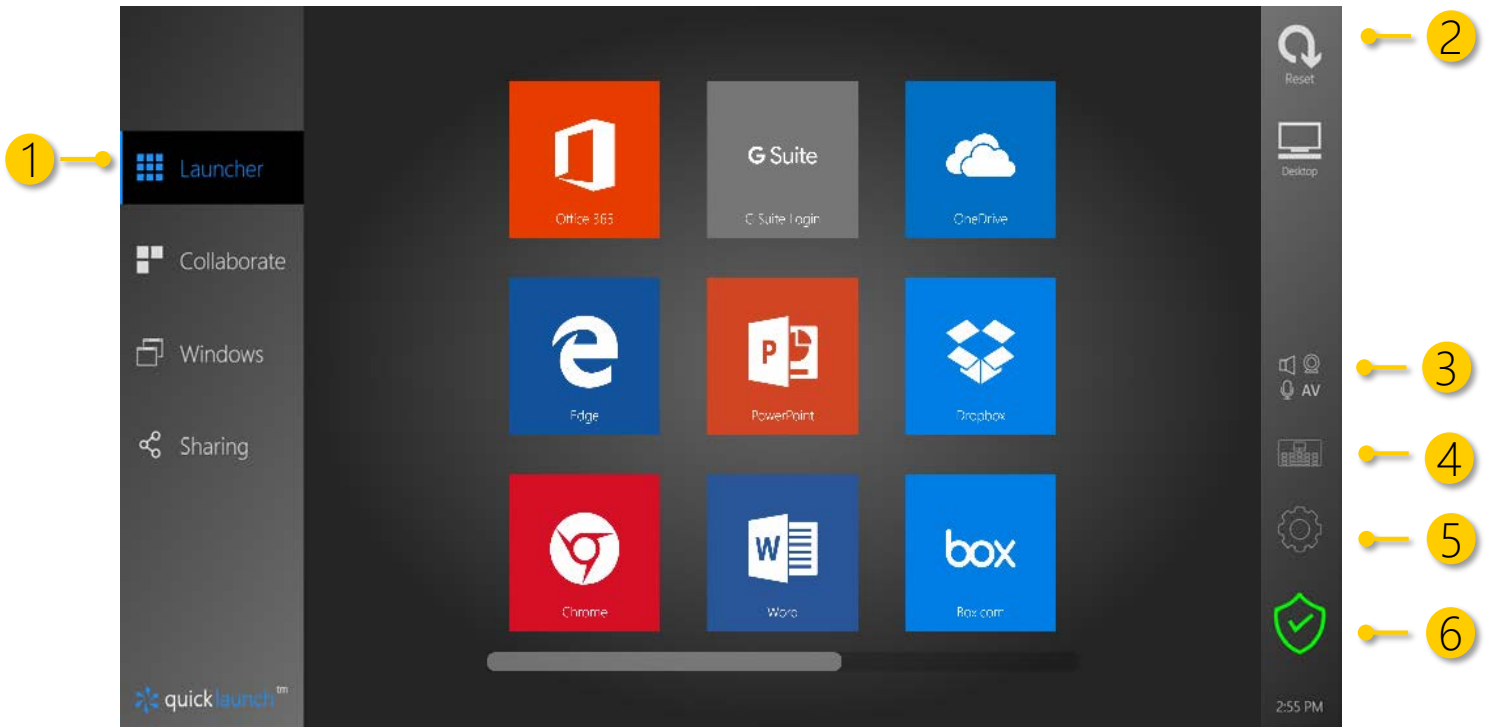

*Easy-Interactive-Touch-Pen-Intelligent*

Quicklaunch™ is designed for organizations that are looking to provide an intuitive, rich collaborative experience. Quicklaunch brings a common interface using a spectrum of devices and can be used in multiple locations. Quicklaunch™ is available as a standalone application or from our partners as part of a meeting room bundle that includes a PC, Camera, Mic, Speakers, wireless and more.

*Huddle Spaces - Meeting Rooms - Training Rooms*
